- Programming Languages: Java, c#.
- Web Technologies: HTML, JavaScript, Django.
- Graphics: Photoshop, Illustrator, InDesign, Flash, 3d max, Sketch up.

## Personal Qualities:

- High Grasping Power.
- Keen Intellect.
- Can work under pressure to meet deadlines.
- Flexible team player.

## Project Details:

### Project 1: Reword application

Period: March 2015 to Present

Description: The reword project was initiated by my friends, I have enrolled in the project and provided assistance in developing an algorithm to detect countable and uncountable uses of articles as well as creating a logo for the company. The project combines the use of our own algorithms as well as the WordNet Framework to reword text. The reword application is helpful for students and teachers alike, the application helps avoid plagiarism and can be used in all levels of education.

Role: Team Member (Developer)

Environment: Visual c# Development

Tools: Microsoft Visual Studio

Responsibilities

- Creating the logo for the application
- Developing the Code as per the requirements.
- Detecting nouns and assigning appropriate articles.
- Testing and integration testing

### Project 2: RPG creative

Period: June 2014-Present

Description

This RPG development project is based off the open source Java Wurfel game engine, the Wurfel engine utilizes unique libraries allowing for real time editing and versatility within gameplay experience. This project was started off the idea of isometric games. However, in game level editing was added which for more interactivity and creativity within gameplay.

Role: Indie Developer

Environment: Java

Tools: Eclipse 3.5, Wurfel engine

Responsibilities:

- Developing the Code
- Creating Graphics
- Game testing

Achievements

- Achieved above average score in Waterloo Canadian Computing Contest.

Qualifications:

- Completion of Grade 11 and 12 computer science with 90%+ averages.
