Personal Qualities:

- High Grasping Power.
- Keen Intellect.
- Can work under pressure to meet deadlines.
- Flexible team player.

Project Details:

Project 1: Reword application
Period: March 2015
Description: The reword project was initiated by my friends, I have enrolled in the project and provided assistance in developing an algorithm to detect countable and uncountable uses of articles as well as creating a logo for the company. The project combines the use of our own algorithms as well as the WordNet Framework to reword text. The reword application is helpful for students and teachers alike, the application helps avoid plagiarism and can be used in all levels of education.

Role: Team Member (Developer)
Environment: Visual c# Development
Tools: Microsoft Visual Studio
Responsibilities
- Creating the logo for the application
- Developing the Code as per the requirements.
- Detecting nouns and assigning appropriate articles.
- Testing and integration testing

Project 2: Acto App
Period: June 2015-September 2015
Description

This android development project called Acto App, it is a based off actionable, dynamic and interactive experiences designed to optimize deep learning and effective skill implementation. I had participated in this project along with 2 other interns and provided aid to a team of developers. For the first month of this internship, I had mostly worked on fixing bugs and removing any hardcoding from their android app. During the second month we had started to work on Natural language processing algorithms that would ultimately, be able to predict actions. This application has many advantages, to training and is currently being employed by beta testers it is also available on the app store and play store.

Role: Intern
Environment: Java (Android), Python
Web Framework: Django
Tools: Android Studio, Open NLP
Responsibilities:
- Developing the Code
- Testing and integration testing
- Fixing Bugs
- Removing any hardcoding

Achievements

- Achieved above average score in Waterloo Canadian Computing Contest.

Qualifications:

- Completion of Grade 11 and 12 computer science with 90%+ averages.

- Job experience at internship.

Personal Details:

Date of Birth: 18/11/1998
Languages Known: English, Russian, French
